

October 2024

Ready to Build Something?

By Jay Smith, Executive Editor | jays@modelaircraft.org

The Inside Loop

BUILDING IS STILL APPRECIATED by many aeromodelers, and the October issue promotes constructing your own aircraft. We have exciting construction articles for a P-40C and a Control Line (CL) model, and, as always, the plans are available as free digital downloads.

We also have an "About Us" article on Old School Model Works, where you can enter to win a \$200 gift certificate and select a kit to build. Furthermore, we also have a great article on trimming a Free Flight (FF) model. I'm excited to have FF, CL, and RC all represented in this issue!

Building your own model and seeing it fly certainly leaves one with a feeling of accomplishment. Whether you already enjoy building or are looking to take on your first project, you will find a lot of inspiration in this issue.

Beyond the two free digital plans this month, we are offering a 20% discount through the AMA Plans Service (<https://plans.modelaircraft.org>) from September 15 through October 31, 2024. It's a great time to select the project that you are most interested in and get building.
